CUTS SHAPES

DieBand Plus[®] is an M42 product developed specifically for toolrooms and machine shops where contour cutting is the norm.

DieBand Plus Does the Job in Toolrooms & Machine Shops

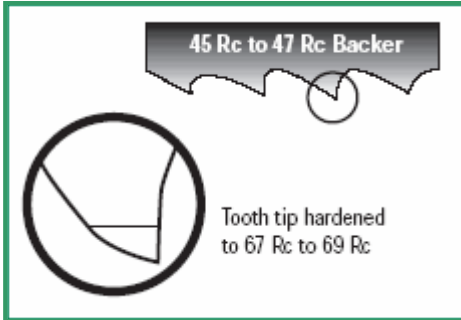

Developed specifically for toolrooms and machine shops where contour cutting all materials is the norm. The flexible backer is married to tooth tips that will hold up to hard cutting.

For optimum results that demand high performance, *DieBand Plus* will not let you down!

SIMONDS[®]

The Professionals' Edge™

DieBand Plus meets and exceeds every tool and die maker's demand for a precise cutting M42 bandsaw blade. It is designed for accurate cuts that skilled craftsmen demand and require—both straight cuts and contour cutting.

DieBand Plus incorporates 8% cobalt high speed wire on a high tensile strength spring backer to provide longer blade life. **DieBand Plus** can be welded with a standard blade welder or a high speed welder.

DieBand Plus - The Professionals' Edge!
